

SMOG CHECK ADVISORY

Official Publication of the California Department of Consumer Affairs/Bureau of Automotive Repair

August 1998

TAC SEEKS VOLUNTEERS ON REPAIR ADVICE

The BAR Chief's Technician Advisory Committee (TAC) is asking technicians and Smog Check instructors to volunteer to write articles, repair technique and tips, and questions and answers explaining repair solutions for their fellow technicians, according to TAC Member Dave Webb.

The TAC was formed to, among other things, determine how to best help smog technicians achieve clean air goals by promoting proper and complete repairs on vehicles failing Smog Checks.

"We determined one method of meeting the goal of this committee was to develop a newsletter with articles written by techs for techs," Webb said. "We have been given a page in the *Smog Check Advisory* for this purpose."

Webb added that the TAC would like to see articles on the following topics:

- special techniques discovered to be useful in correcting common generic and specific vehicle repairs;
- solutions developed to fix pattern failures or odd failure repair problems;
- questions from technicians about failures that continue to be a problem;
- real world answers from technicians to the questions submitted;
- useful techniques for using scanners and lab scopes;

- comments and helpful information about new smog regulations;
- books, videos, web sites, and other training materials and repair sources that have been found to be especially helpful; and
- other topics technicians would like to submit that would benefit other working technicians.

Technicians and instructors interested in sharing their repair problems and solutions for the *Smog Check Advisory* may volunteer by sending their name, address, phone, fax, e-mail address, and story ideas to the Technician Advisory Committee, P.O. Box 188978, Sacramento, CA 95818. ➡

Special Testing for 1987 Fords Required

Some technicians are confused about how to conduct an accurate functional test of the Exhaust Gas Recirculation (EGR) system on 1987 Fords. The following test procedure (contained in Ford Motor Company's *1987 Engine/Emissions Diagnosis Manual*) will help clarify the process. Checking for source vacuum is also part of the EGR system functional test.

1. Make certain all vacuum hoses are correctly routed and securely attached. Replace cracked, crimped, or broken hoses.
2. Make certain there is no vacuum to the EGR valve at idle with the vehicle's engine at normal operating temperature.
3. Install a tachometer.

4. Plug the tailpipe(s) to increase the exhaust system backpressure, leaving a 1/2-inch diameter opening to allow exhaust gases to escape.
5. Remove the vacuum supply hose from the exhaust backpressure transducer nipple and plug the hose. Do not disconnect the transducer from the EGR valve.
6. Start engine, idle with transmission in NEUTRAL, and observe the engine idle speed. If necessary, adjust idle speed according to the manufacturer's specifications.
7. Slowly apply 5-10 inches of mercury vacuum to the backpressure transducer vacuum nipple using a hand vacuum pump.

8. When vacuum is applied to the backpressure transducer replace the valve if any of the following occur:

- engine does not stall;
- idle speed does not drop more than 100 RPM; or
- idle speed does not return to normal (+/- 25 RPM) after the vacuum is removed.

9. Unplug and reconnect the vacuum supply hose to the exhaust backpressure transducer.

10. Remove the tailpipe plug(s).

In addition, further diagnosis may be needed to check for blocked passages, etc. ➡

Student Lane Technicians Learning on the Fast Track in the Real World

After spending only five weeks as a part-time Student Lane Technician at the Consumer Assistance and Referee (CAR) Center in Los Angeles, 28-year-old Jean Paz had a full-time job as a technician's helper at a local dealership. His new boss was duly impressed by the experience he received working in a Referee Center.

"I think the program is going to open the door for a lot of kids," said Paz, who is among the first group of 11 students to participate in BAR's new Student Lane Technician program. Currently, 28 students are participating.

Working 30 to 35 hours per week, Paz found the hands-on experience he was getting was invaluable. He learned how to evaluate and test as many as seven different vehicles each day while his supervisor explained everything in detail.

"It also gave me a background using the old BAR-90 and the new BAR-97," he added.

Administered under a contract with the California Community Colleges Foundation, the program pays students \$9 per hour to work 20 to 40 hours per week at Consumer Assistance and Referee Centers in more than 30 cities across the state. Applicants must be currently enrolled in and attending a community college and carry a minimum of six units in automotive repair, automotive technology, or a related field that includes automotive repair courses.

Currently, there are 36 Referee sites statewide, and 28 are located at community colleges.

It wasn't just the pay or the flexible hours that appealed to the first 11 students who jumped at the chance to be Student Lane Technicians.

"I'm really impressed with the learning opportunity. It's a good chance to use what we learned in class and the lab," said Maynard Jones, Jr., 54, a former Los Angeles City firefighter, who just completed the first of two years of classes in the automotive technology program at Los Angeles' Pierce College, in his pursuit of a second career.

Maynard Jones, a student, applies his classroom knowledge.

Under direct supervision by the Referee, the students are asked to verify why the vehicle is at the Referee station, conduct an inspection, research the equipment required, and point out the items in a visual inspection. As working technicians, they may also conduct a tailpipe and functional test, but are prohibited from signing or issuing a certificate because currently they are not yet licensed smog technicians.

Miguel Murillo, 30, a student at City College in Fresno, was equally excited about the range of duties to which he was being exposed, as well as the research techniques he is learning.

After being at the Referee for two months, and with the help of the two station technicians, Murillo said his knowledge of the Smog Check program and hands-on training increased substantially.

After 24 years in the United States Air Force where he worked on airplanes as an air frame and power plant mechanic, 43-year-old Ed Donahue was looking for a second career. So he started taking classes to get a certificate in driveability and engine performance at Sierra College in Placer County. When his instructor told him about the Student Lane Technician

program, he thought it was a good fit with his plan to work in a smog shop, and he applied at the Referee facility. So far, he hasn't been disappointed.

"I think the opportunity is incredible. You learn more here in one day than in two weeks in school," he said.

At Modesto Junior College, Victor Espinosa, 22, saw a flyer on the Student Lane Technician program and sent in his résumé because he is interested in becoming a smog technician when he graduates in December.

"This was a foot in the door. There's no better place to be than a Referee Center," he said.

Before going back to school, he worked for an auto repair chain for a year and spent another year in an independent shop. In the Referee Center, Espinosa said he has learned a lot about replacement engines and how much there is to know when each car is different every day.

Like his counterparts in other cities, Espinosa is excited about what and how much he is learning on the job. "It is live; it is real. Everything you do has to be right," he said. ➡

Smog Technicians Urged to Renew Licenses At Least 90 Days Before Expiration Date

Smog technicians are urged to mail their license renewal applications **at least 90 days before** their licenses expire to allow time for two exam attempts.

While the Department of Consumer Affairs (DCA) recently approved a contract for computer-based examination administration, it is not expected to take effect until at least July 1999. Once computer-based testing begins, the time needed for registration and receipt of test results is expected to decrease significantly.

In the meantime, however, the estimated processing time for smog technician license renewal applications is two to three weeks, including mail deliveries from the applicant to DCA and from the exam contractor to the applicant.

In addition, the applicant must then choose an exam date and location. If the applicant chooses to return registration materials by mail, it will take an additional two to four days to arrive and another day or two to process the registration. The exam contractor also

mails a postcard about ten days before the exam date.

The time is reduced significantly when an applicant calls the contractor and schedules the exam by telephone, or if the request for a test date is faxed.

Depending on when the registration form is processed, the first available exam date may be three to five weeks away. In addition, once the technician passes the test, it usually takes six days for the results to be reflected in the Vehicle Information Database (VID).

Technicians should also be aware that they must meet all the requirements each time they file an application with DCA. Records are checked to determine if the licensee has:

- ▲ enforcement actions;
- ▲ current ASE certifications (or alternative certifications); and
- ▲ required update training.

Likewise, if a technician fails the test and reapplies, the applicant must meet all the requirements in place at the time the new application is filed (determined by the postmark date on the envelope).

TIPS TO SPEED LICENSE APPLICATIONS

Initial and renewal technician license applications are often delayed because the required materials are not attached or are not complete. Technicians renewing their licenses should make sure to submit the application **at least 90 days before** the license expires. BAR recommends that technicians keep, for their records, a copy of all materials submitted. If proof of training course completion from a certified school is required, such as the 20-hour update training for EA technicians, BAR-97 Transition Course, ASE alternative courses or Clean Air Car Course, here's how to handle the documents:

- ▲ the school must give you an application form (or a photocopy of page 4) with page 4 signed and stamped with the school's official BAR stamp, showing the course(s) completed;
- ▲ you must submit an application (or copy of page 4) with the original stamp and instructor signature;
- ▲ you may submit a photocopy of page 4 only if it has the original signature of the instructor; and
- ▲ faxed copies of page 4 will not be accepted.

ISSUES & ANSWERS...

All questions must be accompanied by a name, address and telephone number, and will be verified before publication. Questions will be answered and published on a space available basis.

— THE EDITOR

Q. When doing an emissions inspection with the dyno, I have to spend too much time trying to maintain the vehicle's speed either at 14 to 16 MPH or 24 to 26 MPH, and I had to restart all over again if the third try was not done successfully. My question is: why is the window 14 to 16 / 24 to 26 so narrow, and the elapse time for correcting it so short? Maybe with more practice the above problem would be overcome, but I still wonder if any technician has the same problem as mine. By the way, I am using the Sun Analyzer System.

—Le-Dung Nguyen, Laguna Beach, CA

A. In order for an emissions test to be accurate and repeatable, the test procedure must be consistent. Changing variables during a test is likely to alter the test results, possibly even changing the outcome of the test. Holding relatively tight controls on the test parameters ensures that consumers will be getting a more consistent test regardless of who is performing the test.

For the California ASM test required for Enhanced Area vehicles, the vehicle must remain between 14 and 16 mph for the 5015 mode and 24 and 26 mph for the 2525 mode. BAR chose these windows because they are small enough to insure repeatable tests, yet easy enough for most technicians to perform.

As a result, we discovered that errors are more likely to be caused by

acceleration violations than by speed excursions. While in a test mode, the vehicle may not accelerate or decelerate at a rate greater than 0.4 mph/second. If it does, however, the emission data resulting from that event is not used in the "pass/fail" decision.

While many technicians initially complain that the acceleration and speed violation window is too small, once they gain experience performing ASM tests, most find that the window is more than adequate.

BAR realizes that in some rare instances, a vehicle may have unique conditions that make it virtually untestable with these test parameter limits. In these rare cases, the vehicle must be referred to a Consumer Assistance and Referee Center for inspection. ➡

DISCIPLINARY ACTIONS AND CITATIONS

The following is a list of citations issued and disciplinary actions taken against Smog Check stations and technicians over the last several months.

Previously, this information has been published in the *Repair Reporter*, the Bureau of Automotive Repair's sister publication for all automotive repair dealers. However, violations of the Smog Check program laws and regulations will now be published monthly in the *Smog Check Advisory*. Under Business and Professions Code Section 9882.4, the DCA/BAR is required to publish disciplinary actions taken against licensees and registrants. Since the *Repair Reporter* has traditionally been published only twice a year, a backlog of

unpublished citations and disciplinary actions has occurred, resulting in the untimely release of information to the public and industry.

While the *Smog Check Advisory* will publish only violations of the laws and regulations by Smog Check stations and technicians, the *Repair Reporter* will continue to publish violations by other auto repair stations and technicians engaged in general auto repair work. In addition, plans are being made to publish the *Repair Reporter* quarterly (beginning in 1999) rather than semi-annually as a result of industry recommendations made at joint BAR/Industry workshops on automotive-related issues held statewide in March and April. ➡

DISCIPLINARY ACTIONS

AGBABIKA, BABATUNDE—Pinole
Order: Basic Area Technician license application of respondent Babatunde Agbabiaka is denied. (03/19/98)

ALL SERVICE EXXON—Sunnyvale, MOHAMMAD NIKOO, Owner, JAMES WELDON FORT, Employee.
Order: ARD registration and Smog Check Station License revoked; ARD revocation stayed: three years probation on the following conditions: obey laws and regulations; report to BAR quarterly; report any financial interest in any auto repair facility; provide BAR unrestricted access to inspect all vehicles undergoing repairs or inspections; pay BAR \$12,518.87; Fort—Basic Area Technician License revoked. (04/15/98)

ALTEC SMOG & TUNE—Bakersfield, TIMOTHY SCOTT PADDOCK, Owner/Employee.
Order: ARD registration and Smog Check Station License revoked; ARD revocation stayed: three years probation on the following conditions: obey laws and regulations; pay BAR \$4,500.00. (04/02/98)

ANDY'S MOBILE TUNE UP—Glendale, ANTRANIK JABOURIAN, Partner, MISAK PANOSIAN, Partner.
Order: ARD registration revoked; revocation stayed: three years probation on the following conditions: obey laws and regulations; report to BAR quarterly; report any financial interest in any auto repair facility; Antranik Jabourian shall comply with all of the terms and conditions of the plea agreement; Smog Check Station License revoked; upon successful completion of probation, respondent's registration and license will be fully restored. (10/27/97)

ARTINIAN, HAIG, a.k.a. HAIG AWANIS AROUSIA ARTIN, and HAIG AWANIS AROUSIA ARTIN, d.b.a. **GOLDEN SHELL**—Santa Ana.
Order: ARD registration permanently invalidated. Each of the registrations and licenses issued by BAR to Golden Shell and to Haig Artinian is revoked. (02/03/98)

AU, DARYL—San Francisco.
Order: Smog Check Technician License revoked; revocation stayed: three years probation on the following conditions: obey laws and regulations; report to BAR quarterly; take and successfully complete eight hours of retraining; the terms and conditions shall follow respondent if he takes and passes the course requirements for an EA license; upon successful completion of probation, respondent's Smog Check Technician License shall be fully restored. (01/28/98)

AUTO HOME SERVICE—Costa Mesa, IGOR ZALMAN ERENBURG, Owner.
Order: ARD registration and Smog Check Station License revoked. (02/03/98)

CANYON MOBIL—Chula Vista, ALEN GUEBROU KIDANE, a.k.a. ALEN KIDANE BUEBROU, Owner, MARIO ZUNIGA, Employee, JUAN AVALOS SANTAMARIA, Employee.
Order: ARD registration and Smog Check Station License revoked; ARD revocation stayed: three years probation on the following conditions: obey laws and regulations; report to BAR quarterly; report any financial interest in any auto repair facility. (04/28/98)

CHANCE, TRACY ARTHUR—Hanford.
Order: Any smog check technician license issued to Tracy Arthur Chance shall be placed on probation for three years on the following conditions: obey laws and regulations; report to BAR quarterly; successfully complete the full Clean Air Car Course. (03/06/98)

CHARLIE TUNA'S AUTO CENTER—Van Nuys, CHARLES FREDERICK SCHERF, Owner.
Order: ARD registration and Smog Check Station License revoked; Smog Check Technician License revoked; all other licenses/registrations issued to respondent are hereby revoked; pay BAR \$11,776.86. (04/28/98)

COVARRUBIAS, REYES—Oxnard.
Order: Application for an Advanced Emission Smog Check Technician license denied. (11/17/97)

DOUBLE AA AUTO SMOG—Los Angeles, ANGELA ARDON, Owner, LEONARDO BECERRIL, Employee.
Order: ARD registration and Smog Check Station License revoked; Smog Check Technician License revoked. (02/19/98)

EL PORTAL SHELL SERVICE—San Pablo, EDWARD WELLS, Owner.
Order: ARD registration is revoked; revocation stayed: three years probation on the following conditions: obey laws and regulations; report to BAR quarterly; report any financial interest; pay BAR \$3,661.00; upon successful completion of the probationary period, the ARD registration will be fully restored. Smog Check Station license revoked; revocation stayed: three years probation on the following conditions: identical terms as set forth above pertaining to El Portal's ARD registration; license suspended for a period of 60 days; post a sign stating reasons for suspension; upon successful completion of the probationary period, the Smog Check Station License will be fully restored. (02/12/98)

FAKHOURY SMOG & AUTO CENTER—Covina, MARWAN ELIOS FAKHOURY, Owner.
Order: ARD registration permanently invalidated; Smog Check Station License revoked. (02/05/98)

GEORGE'S SIERRA SHELL—Fontana, DOUGLAS JOHN WHITEMAN, Partner, MABELLE LUICILLE WHITEMAN, Partner.
Order: ARD registration and Smog Check Station License revoked; revocation stayed: two years probation on the following conditions: Smog Check Station License suspended for a period of forty-five days; post a sign stating reasons for suspension; obey laws and regulations; report to BAR quarterly; report any financial interest; pay BAR \$4,331.20. (01/13/98)

GOLDEN PROBE SMOG CHECK—Midway City, MINH HUU DANG, Employee.

Order: DANG: Advanced Emission Specialist Technician license revoked; respondent prohibited from seeking reinstatement of his Advanced Emission Technician license for a period of two years during this period of probation; respondent prohibited from seeking new licensure as an Emission Specialist Technician license for a period of two years. (09/22/97)

GOLDEN PROBE SMOG CHECK—Midway City, CUONG MANH PHAM, Owner/Employee.

Order: ARD registration and Smog Check Station License and Smog Check Technician License revoked; ARD revocation stayed: two years probation on the following conditions: respondent prohibited from seeking reinstatement of his Smog Check Station and Technician licenses during this period of probation; obey laws and regulations; report to BAR quarterly; report any financial interest in any auto repair facility; pay BAR \$5,700.00. (09/22/97)

HENRY AUTO SALES & REPAIRS—Garden Grove, HUNG NGOC NGUYEN, Owner.

Order: ARD registration and Smog Check Station License revoked. (02/03/98)

J & D AUTO SERVICE—Rialto, JERRY ANTHONY AMATO, Owner.

Order: ARD registration and Smog Check Station License revoked; revocation stayed: two years probation for ARD and three years probation for Smog Check Station License on the following conditions: Smog Check Station License suspended for a period of 30 days; post a sign stating reasons for suspension; obey

laws and regulations; report to BAR quarterly; report any financial interest in any auto repair facility; provide BAR unrestricted access to inspect all vehicles undergoing repairs or inspections; pay BAR \$2,000.00. (01/21/98)

JT AUTO SERVICE—Freedom, ANTONIO L. RINCON, Owner.
Order: ARD registration and Smog Check Station License revoked. (02/03/98)

K AUTO REPAIR—Rosemead, KEVIN YAM, a.k.a. KHOEURNG KEVIN YAM, Owner, MINH KIN LAM, Employee.
Order: Lam - Smog Check Technician License revoked. (04/28/98)

L.A. AUTO REPAIR & BODY SHOP—Los Angeles, JUAN FLORES, a.k.a. JUAN FLORES HERNANDEZ, Owner.
Order: ARD registration application is granted, issued and revoked; revocation stayed: three years probation on the following conditions: obey laws and regulations; report any financial interest; provide BAR unrestricted access to inspect all vehicles undergoing repairs or inspections; pay BAR \$2,000.00. (02/03/98)

LUZZI AUTO REPAIR—Huntington Beach, JOHN LUZZI, Owner.
Order: ARD registration and Smog Check Station License. (02/03/98)

MARRUJO, RICK B.—Fontana.
Order: Smog Check Technician License revoked. (02/03/98)

MARTY'S AUTO SERVICE—San Jose, MARTIN JOSEPH BONANNO, Owner.
Order: ARD registration and Smog Check Station License revoked; Smog Check (Basic Emission) Technician License revoked; pay BAR \$11,027.08. (02/03/98)

MEHRANS MOBIL—Glendale, MEHRAN BASTAJIAN, a.k.a. MEHRAN YERVANT BOODAJIAN, Owner, TONY

ZAREH ARSLANIAN, a.k.a. ZAREK ARSALANIAN, Employee.

Order: Smog Check Technician License revoked; any additional licenses issued in the name of Tony Zareh Arslanian are revoked. (02/11/98)

MEHRANS MOBIL—La Crescenta, MEHRAN BASTAJIAN, a.k.a. MEHRAN YERVANT BOODAJIAN, Owner.

Order: ARD registration and Smog Check Station License revoked; revocation stayed: three years probation on the following conditions: Smog Check Station License suspended for a period of forty days; post a sign stating reasons for suspension; obey laws and regulations; report to BAR quarterly; report any financial interest in any auto repair facility; provide BAR unrestricted access to inspect all vehicles undergoing repairs or inspections; pay BAR \$4,000.00. (12/30/97)

MISSION COMPLETE AUTO REPAIR—San Jose, BI A. SI, Owner, TRUAT QUANG LE, Employee.

Order: LE—Smog Check Technician License revoked; revocation stayed; three years probation on the following conditions: Smog Check Technician License suspended for a period of 60 days; obey laws and regulations; report to BAR quarterly; Basic Area Technician license shall be issued if respondent passes the examination and meets all other requirements, however, that said license shall be immediately revoked, revocation stayed and subject to the same terms and conditions as set forth above. (12/15/97)

MOTLEY, ARENTHIA, MOTLEY, LAWRENCE—Clovis.

Order: ARD registration application of respondent Arenthia Motley is denied; Basic Area Technician license application of respondent Lawrence Motley is denied. (03/18/98)

NGUYEN, HO ANH—Sacramento.

Order: Advanced Emission Specialist license application of respondent Ho Anh Nguyen is denied. (03/19/98)

NSHANIAN, ALBERT HAGOP—Glendale.

Order: Advanced Emission Smog Check Technician license revoked. (10/27/97)

PACOIMA CHEVRON AUTOMOTIVE—Pacoima, KEITH MARKOVITCH, Owner.

AUTOMOTIVE REPAIR DEPOT—Sylmar, KEITH BRADFORD MARKOVITCH, Owner.

Order: ARD registration and Smog Check Station License issued to Pacoima Chevron Automotive is revoked; ARD registrations and Smog Check Station License issued to Automotive Repair Depot is revoked.

Name & Address Change Notification Required

Licensees who change their name and/or address are required to notify DCA/BAR's Licensing Division within 14 days. Here's how to do it.

- ▲ Put the change in writing and forward it along with your original Automotive Repair Dealer business registration and all associated station licenses (a photocopy of the business license may be posted at the place of business until the new license arrives); or

- ▲ Contact DCA/BAR's Licensing Division at (916) 322-4000 to request a change of name/address form. When you receive the form, complete and mail it, along with your original Auto Repair Dealer

business registration and all associated station licenses (a photocopy of the business license may be posted at the place of business until the new license arrives) to:

Licensing Division
400 R Street, Suite 3080
Sacramento, CA 95814

If you're a Smog Check technician at a testing site, ask the test proctor for a Change of Candidate Information form, fill it out and return it to the proctor. ➡

(02/03/98)

PALM SPRINGS TIRE & AUTOMOTIVE CENTER, INC., d.b.a. ELITE TIRE & AUTOMOTIVE CENTER—Cathedral City.

Order: ARD registration and Smog Check Station License revoked; Official Lamp & Brake Station License revoked; revocation stayed: two years probation on the following conditions: obey laws and regulations; report to BAR quarterly; report any financial interest in any auto repair facility; pay BAR \$2,000.00. (09/29/97)

PEREZ TIRES & SMOG—Colton, TRINADAD P. PEREZ, Owner, MARK W. KLAUDT, Employee.

Order: ARD registration and Smog Check Station License revoked. (02/19/98)

R & R SMOG—Olivehurst, JASON RICHBACHER, Owner/Employee.

Order: ARD registration and Smog Check Station License revoked; ARD revocation stayed: three years probation on the following conditions: obey laws and regulations; report to BAR quarterly; report any financial interest in any auto repair facility; provide BAR unrestricted access to inspect all vehicles undergoing repairs or inspections; submit printed invoices, work orders, or estimates revised or new to the Bureau 30 days prior to use; pay BAR \$6,590.00; Basic Area Technician License revoked. (04/28/98)

RIALTO TEXACO SERVICE—Rialto, KAMAL FARHAN BATECH, Owner, GARY DEAN TAVIS, Employee.

Order: ARD registration is revoked;

revocation stayed: two years probation on the following conditions: license suspended for a period of 10 days; post a sign stating reasons for suspension; report to BAR quarterly; obey laws and regulations; report any financial interest; upon compliance with the terms and conditions set forth above and upon completion of the probationary period, the ARD registration of respondent Kamal Farhan Batech, owner, d.b.a. Rialto Texaco Service, shall be fully restored; pay BAR \$1,366.98. Smog Check Station license revoked; no smog check license shall be issued to respondent Batech unless he has complied with all terms and conditions of probation for ARD No. 141025. Any smog check license issued to respondent Batech within the next five years shall be a probationary license for a period of two years, subject to the following terms and conditions; report to BAR quarterly; report any financial interest; obey laws and regulations; upon compliance with the terms and conditions set forth above and upon completion of the probationary period, the Smog Check Station License of respondent Kamal Farhan Batech, owner, dba Rialto Texaco Service, shall be fully restored. (02/03/98)

SMOG CENTER—Fresno, MASSOUD KHOSROZADHE, Partner, HOSSEIN MAHJOOB, Partner.

Order: ARD registration revoked; revocation stayed: three years probation on the following conditions: obey laws and regulations; report to BAR quarterly; report any financial interest in any auto repair

facility; upon successful completion of probation, respondent's ARD registration shall be full restored; Smog Check Station License revoked. (02/25/98)

TURNBULL, MICHAEL ANDREW—Fontana.

Order: Smog Check Technician License revoked. (02/03/98)

WHITEMAN, DOUGLAS JOHN—Fontana.

Order: Smog Check Technician (Advanced Emission Specialist) application is granted/ issued but then revoked; revocation stayed: two years probation on the following conditions: Advanced Emission Specialist License suspended for a period of 45 days; post a sign stating reasons for suspension; obey laws and regulations; report any financial interest. (01/07/98)

WICHOS SMOG—Los Angeles, LUIS MARIO RAMOS, Owner.

Order: ARD registration and Smog Check Station License revoked; pay BAR \$6,298.69; Advanced Emission Specialist Technician license revoked. (04/15/98)

WINBLOOD, JACK WARE—Cathedral City.

Order: Smog Check Technician License revoked; Official Lamp & Brake Adjuster license revoked; revocation stayed: three years probation on the following conditions: probation conditions shall be applied to all newly issued licenses; Smog Check Technician License suspended for 20 working days; obey laws and regulations; report to BAR quarterly; pay Ivan Hyso \$200.00; pay BAR \$1,200.00. (09/29/97)

Smog Check Advisory

August 1998

Little Scoops...

▲ Technicians searching for ways to prepare for a BAR exam should know that vendors selling "Exam Preparation Guides" do not have legal access to examination materials or information. As a result, BAR cannot verify the accuracy of such materials, or their value for exam preparation. The actual licensing examination questions are written, reviewed, edited, and evaluated by licensed technicians. The exam plan published in the *Applicant's Guide to the Smog Check Technician Licensing Examination* is current. The guide is free with each license renewal packet, or can be obtained by calling DCA's Consumer Information Center toll-free at (800) 952-5210.

▲ Likewise, preparation guides for a "Test-Only" technician exam are of no current value as no such examination is currently being offered by BAR. This license category will not exist unless and until regulations have been formulated and a public notice is published.

▲ When conducting an ASM test on an automatic transmission vehicle, the lower engine RPM limit does not apply. Automatic transmission vehicles should be tested in drive, even if the RPM drops below the limit used for manual transmission vehicles.

▲ If, for some reason, your BAR-97 equipment is unable to perform an ASM test, you may **not** perform TSI tests on vehicles that require ASM tests. To do so violates section 44012

of the California Health and Safety Code.

▲ As a result of temporary technical difficulties in issuing licenses and badges, Smog Check technicians who have passed the examination and received a letter from the DCA confirming their positive exam results may continue to perform inspections by posting the "pass letter" and manually entering the new and/or renewed license number into the BAR-90 Test Analyzer System (TAS) or the BAR-97 Emission Inspection System (EIS) machines until the license and badge arrive.

▲ Smog Check stations and technicians who wish to verify license expiration dates may call the DCA Consumer Information Center at (800) 952-5210 or the Licensing Division at (916) 332-4000.
